

This powerful fan heater provides a warm air barrier that helps reduce building heat losses through external doors that are frequently opened. Install over doorways and other openings in commercial and light industrial applications such as shops, offices, supermarkets and factories. External controls available. Contact us for details.

SPIRAL GILLED TUBE

Providing a simple, efficient and cost effective method of heating for a multitude of applications, including public areas, glass wash applications in large glazed areas and modern buildings, our spiral tube is designed and supplied in a standard range and can be fabricated to suit your requirements.

The tube can be supplied as a low level stand alone unit, with integral feet or as part of a trench unit which sits flush with the floor. Both models are available in electric or wet versions and in wide range of finishes.

Please contact us to discuss your project, and we will provide a design proposal.
