

7372-2

7373-3

The Supertuff has been specifically designed as a range of anti-vandal heaters. With its 8mm thick reinforced steel casing and tamperproof lockable steel control cover, the Supertuff is ideal for public or communal areas in projects such as schools or hospitals. In addition to the features of the standard Supertuff, the LST has a panel touch temperature of less than 55°C at full power and an intrusion proof mesh grille. This heater is ideal for primary schools, homes for the elderly and in bathrooms for the disabled.
