

ULTIME

The Ultime is a radiant glass panel with rounded corners and is available in vertical and horizontal versions. Its stylish glass design reflects the decor of the room. Ultime has dual-element technology and a dual-control thermostat with digital display. It is compatible with the MD2H Microdriver and Cassette Programmer (see page 44). All models are available in a white or black finish. A wide range of colours are available for certain models. See colour chart for details.
